Each week, each group is required to present their project. Show your tutor:

· What (you are delivering);
· When (you will be delivering);
· Why (you have recommended the artefacts you are delivering);
· How much (time you plan to spend on your project and time you have spent on your project. What is the gap and what are you doing about it)

Presentation Properties
Use models rather than words.

Your tutors are looking for the 'big picture' that describes your project. Be prepared to answer with detail at question time.

This week's specials

Final Dashboard, Decision Making & Research Paper

1. End-to-End System Demonstration
- Demonstrate MySQL → KNIME → ML → MySQL → Dashboard using reproducible workflows.
- Explain the database tables, key pipeline steps, and refresh or rerun process.

2. Final Interactive Dashboard
- Present KPIs, appropriate charts, interactive filters, and model results that answer the decision questions.

3. Evidence-Based Decision Recommendations
- Present at least three actionable recommendations, each tied to data/model evidence.
- Explain expected impact, assumptions, limitations, and potential risks.

4. Research-Style Project Paper (IEEE Format)
- Submit a 6–10-page two-column IEEE-style paper (PDF plus editable DOCX or LaTeX source).
- Include Abstract, Keywords, Introduction, Related Work, Methodology, Experiments & Results, Discussion & Decision Recommendations, Conclusion, and References.
- Use at least five relevant sources and accurately report data quality and model performance.

5. Final Submission & Q&A
- Submit MySQL scripts/data instructions, KNIME workflows, dashboard source, project paper, and GitHub/Workspace README.
- Demonstrate individual contributions and answer questions on methodology and decisions.

6. Final Plan vs Actual Reflection
- Summarize planned versus actual effort, unresolved issues, and potential improvements.

Goal of Week 4:

A complete end-to-end decision-support solution, final dashboard, evidence-backed recommendations, reproducible repository, and research-style paper.
